

How Do I Get Shippers?

Go to your local grocery store and look at the label, it will show who made it, imported or distributes it.

Take a picture with your phone or write it down and add them to your prospect list

Look at the load tender from the shipper, it will have a consignor and a consignee on there. Write those names down and add them to your prospect list.

Every business is built off of referrals and reviews, ask your current customers for referrals
